

OL-180° External PIR

The motion detector works on passive infra red technology. The detector will switch on the connected lights when it registers 'warm movement' within the detection range. The built in photo cell prevents the detector working in day light.

Product Specification

General Specification

Switching Capacity	1000W Incandescent, 200W Fluorescent
Degree of Cover	180° Horizontal
Detection Range	Max. 12 metres

Order Code

LY19-001-42	White
LY19-001-43	Black
